OFFICIAL BRAND REFERENCE / SAMPLE DATASET

TERALUNE

SPRING WATER | REFRESHMENT, NATURALLY.

Brand Identity & AI Governance Guidelines

A structured source of truth for evaluating brand language, product facts, trademarks, copyright and visual assets.

DOCUMENT PURPOSE

This document is the authoritative sample brand profile for testing Identiq. Upload this PDF into the Brand Knowledge Hub and use it as the reference when reviewing the separate Teralune advertisement. All business details, product specifications, claims and policies in this document are fictional and created solely for software testing.

1. Brand overview

Teralune is a fictional bottled-water brand positioned around clear, dependable and everyday refreshment. Its identity is calm, natural and contemporary. The brand communicates with simple, factual language and uses restrained visual elements inspired by water, flowing forms and the natural landscape.

BRAND DETAIL	OFFICIAL SAMPLE VALUE
Brand name	Teralune
Legal entity	Teralune Beverages Private Limited (fictional)
Primary product	Teralune Still Spring Water
Tagline	Refreshment, Naturally.
Website	www.teralune.example
Contact email	hello@teralune.example
Office address	Suite 204, Cedar Point, Baner Road, Pune, Maharashtra 411045, India (fictional)
Founded	2022 (fictional)
Primary market	India
Audience	Adults seeking convenient everyday drinking water; offices, commuters, retail and hospitality buyers.

Brand positioning: Calm, clear, refreshing, dependable and considerate. The brand uses simple, factual language and restrained visual elements inspired by water and the natural landscape.

Fictional-data notice: Teralune, its products, contact details, prices and source references are fictional. The reserved .example domain is not a live commercial website.

01 / VISUAL IDENTITY

Logo guidelines

The Teralune logo is the primary identifier of the brand. Use the approved artwork consistently and preserve its proportions, colours and surrounding space.

TERALUNE

SPRING WATER | REFRESHMENT, NATURALLY.

Approved logo construction

VERSION	APPROVED USE	REQUIREMENT
Primary horizontal logo	Website headers, advertisements, posters and documents.	Use the complete droplet mark and TERALUNE wordmark with the tagline when space permits.
Symbol-only mark	Small icons, app tiles and compact brand placements.	Use only the approved droplet-and-wave symbol. Do not recreate it with a different shape.
Reversed logo	Dark navy backgrounds.	Use the approved white wordmark with the teal symbol. Maintain strong contrast.

Approved logo colours

COLOUR	HEX VALUE	USAGE
Deep Current	#163A52	Primary wordmark, headings and dark backgrounds.
Spring Teal	#239A8B	Droplet mark, highlights and supporting accents.
Mist	#DFF1ED	Light panels and soft backgrounds.
Cloud White	#F4F8F7	Primary light background and reversed logo field.

Mandatory logo rules

- LOG-01 - Proportions: Preserve the original width-to-height ratio. Never stretch, compress, skew, rotate or crop the logo.
- LOG-02 - Colour: Use only the approved Deep Current, Spring Teal and white/reversed versions. Do not recolour the mark or apply gradients.
- LOG-03 - Clear space: Keep an empty margin around the complete logo equal to at least the height of the droplet symbol on all sides.
- LOG-04 - Minimum size: Do not display the complete logo below 28 mm wide in print or 120 px wide in digital layouts. Use the symbol-only mark at smaller sizes.
- LOG-05 - Background: Place the logo on a plain, high-contrast area. Do not place it over busy photographs, patterned backgrounds or visually competing elements.
- LOG-06 - Integrity: Do not redraw, add shadows, outlines or effects, alter the leaf/wave symbol, or combine the mark with another organisation's logo.

AI review instruction: Flag a logo when its visible proportions are distorted, its colours fall outside the approved versions, it is cropped, its clear space is obstructed or it is too small to remain legible. If an image is too low-resolution to verify, return Needs Human Review rather than asserting a definite violation.

02 / PRODUCT STANDARDS

Product guidelines

All product names, package details, sizes and prices must match the approved product records. Marketing material must not introduce specifications or benefits that are not documented here.

Approved product record

FIELD	APPROVED VALUE	AI VALIDATION RULE
Product name	Teralune Still Spring Water	Use the full approved name on first reference. Do not invent alternate product names.
SKU	TLSW-500	SKU must match exactly wherever displayed.
Pack size	500 mL bottle	Use “500 mL” with a space and capital L. Do not write 500ml or 500 ML in formal product specifications.
Maximum retail price (sample)	₹25 per 500 mL bottle	Compare the displayed amount and pack size with this approved record. Flag ₹19, ₹29 or any other amount as conflicting.
Product type	Still spring water	Do not describe the product as sparkling, flavoured, mineral-enhanced or electrolyte-added.
Bottle appearance	Clear PET bottle; Deep Current cap; white label with Spring Teal droplet mark.	Do not show a different cap colour, altered label, extra ingredients or modified packaging as the approved product.
Fictional source record	Sahyadri Spring Source - Record SRC-01 (fictional)	Use this source name only as sample brand data. Do not imply external certification.

Approved product descriptions

- PRD-01: “Teralune Still Spring Water” is the approved product name.
- PRD-02: “Still spring water for everyday hydration.” is an approved descriptive statement.
- PRD-03: “A crisp, refreshing option for everyday moments.” is an approved lifestyle description.
- PRD-04: The only approved pack size in this sample dataset is 500 mL.
- PRD-05: The sample maximum retail price is ₹25 per 500 mL bottle. Any advertised selling price or discount must be separately authorised; no sale price is currently approved.

Product accuracy restrictions

- Do not claim that the water cures, treats or prevents a disease or medical condition.
- Do not claim that it boosts immunity, detoxifies the body, improves concentration, cures tiredness or produces guaranteed health outcomes.
- Do not claim “100% pure”, “clinically proven”, “doctor recommended”, “mineral enriched”, “carbon neutral” or “plastic free” unless a valid, approved evidence record is supplied.
- Do not invent laboratory results, certifications, awards, endorsements, source locations or nutritional/mineral values.
- Do not change the product volume, price, SKU or packaging details to make an advertisement more persuasive.

AI review instruction: Treat the approved product record as the source of truth. An exact mismatch is Conflicting. A benefit or superiority claim not covered by an approved evidence record is Unverified. Never infer that an unsupported claim is false solely because it is absent from this document.

02 / PRODUCT STANDARDS - CONTINUED

Approved claims & fact verification

This section gives the AI reviewer a controlled list of acceptable wording and a clear distinction between approved statements, unsupported claims and factual conflicts.

Approved marketing claims

CLAIM ID	APPROVED WORDING	PERMITTED CONTEXT
CLM-01	“Refreshment, Naturally.”	Official tagline. Use exact punctuation and capitalisation where practical.
CLM-02	“Still spring water for everyday hydration.”	Product description.
CLM-03	“A crisp, refreshing option for everyday moments.”	General lifestyle copy.
CLM-04	“Available in a 500 mL bottle.”	Product availability and pack-size statement.

Claims requiring evidence or prohibited in this sample

CLAIM TYPE	EXAMPLE TO FLAG	EXPECTED AI RESULT
Medical / therapeutic	“Cures dehydration instantly.”	Unverified; high severity. Do not present as an approved product benefit.
Health enhancement	“Boosts immunity” or “detoxes your body”.	Unverified; request an approved evidence source or remove.
Absolute / superiority	“The purest water in India” or “No. 1 water”.	Unverified unless a substantiation record is supplied.
Certification / endorsement	“Clinically proven”, “doctor approved” or use of an unapproved certification badge.	Unverified; request the exact authorised supporting record.
Environmental claim	“Carbon neutral”, “plastic free” or “100% sustainable”.	Unverified; require specific substantiation and approved wording.
Price / offer claim	“Now only ₹19” or “50% off”.	Conflicting or unverified because no discounted price or offer is approved.

Source-of-truth register

SOURCE ID	RECORD	AUTHORITY
SRC-BRAND-01	This Brand Identity & AI Governance Guidelines document.	Authoritative for brand voice, identity and usage policies.
SRC-PROD-01	Approved Product Record on page 3 of this document.	Authoritative for product name, SKU, size, price and package attributes.
SRC-CLAIM-01	Approved Marketing Claims on this page.	Authoritative for the exact approved marketing statements.
SRC-ASSET-01	Approved logo and product appearance in this document.	Reference for visual comparison; exact matching may require human review.

Verification principle: Use only approved records supplied in the Brand Knowledge Hub. If no authoritative record exists, label the claim Unverified and explain what evidence is missing. Do not invent a source, citation, certification or numerical fact.

03 / LEGAL AND OWNERSHIP RULES

Trademark & copyright guidelines

These sample rules govern the use of the Teralune name, logo, original creative materials and third-party intellectual property.

Mark status for this test dataset: Teralune is a fictional brand name created for prototype testing. The sample brand owner uses Teralune™ as a claimed brand identifier. This document does not assert that the mark is registered. The ® symbol must not be used.

Trademark rules

- TM-01 - Brand name: Spell the name exactly as “Teralune”. Do not alter the spelling, split the word, or create confusingly similar names in branded material.
- TM-02 - Symbol: Use “Teralune™” on the first prominent reference in formal promotional copy where a trademark marker is required. Do not use “Teralune®” because no registration is claimed in this sample dataset.
- TM-03 - Logo ownership: Use only the approved Teralune logo supplied in the Brand Knowledge Hub. Do not copy, trace, recolour or recreate it from an unrelated source.
- TM-04 - Third-party marks: Do not use another company’s name, logo, product packaging, mascot or distinctive brand design in a way that suggests sponsorship, affiliation or endorsement without documented permission.
- TM-05 - Certifications: Do not display a certification, government emblem, testing seal or endorsement badge unless the organisation has supplied a valid and approved authorisation record.
- TM-06 - Comparative use: Competitor names may be mentioned only in factual, non-misleading comparison material that has been authorised for that purpose.

Copyright and creative ownership rules

- CP-01 - Original materials: The sample logo, product label, brand copy and supplied creative assets are fictional test materials designated for this Identiq demonstration.
- CP-02 - Third-party images: Use an image only when its creator, licence or written permission is documented. Record the source and permitted usage in the asset metadata.
- CP-03 - No unauthorised copying: Do not reproduce photographs, illustrations, layouts, packaging designs, slogans or other creative work from another brand without permission.
- CP-04 - Stock assets: Stock images must have a licence that covers the intended commercial use. A visible watermark is not acceptable in final campaign artwork.
- CP-05 - AI-generated assets: Record that an asset was AI-generated when required by the organisation’s content policy. Review the output for unintended third-party logos, copied characters or recognisable protected material.
- CP-06 - Attribution: Where a licence requires attribution, preserve the required creator, source and licence information.

What the AI should flag

DETECTED CONDITION	EXPECTED RESULT
“Teralune®” appears in an advertisement.	Conflicting - the approved sample mark is Teralune™; ® is not authorised.
An unapproved company logo or certification badge appears.	Unverified - request an authorised asset or substantiation record.
A third-party image has no licence or source record.	Unverified - require human confirmation of usage rights.
The official logo is modified or copied into a new form.	Conflicting - refer to LOG-01 through LOG-06.

These rules are sample internal brand policies for testing. They are not legal advice and do not establish actual trademark registration or copyright ownership outside this fictional dataset.

04 / VISUAL ASSET STANDARDS

Image and design guidelines

All campaign imagery should reinforce Teralune's clean, calm and refreshing identity. Visual choices must not misrepresent the product, imply unsupported benefits or introduce unapproved brand elements.

Approved visual direction

ELEMENT	APPROVED STANDARD	CHECK TO PERFORM
Colour palette	Deep Current #163A52; Spring Teal #239A8B; Mist #DFF1ED; Cloud White #F4F8F7.	Compare dominant brand elements with approved HEX values. Small photographic variations are not automatically a violation.
Typography	Headings: clean geometric sans serif, preferably Manrope Bold. Body: readable sans serif, preferably Inter or an equivalent.	Check available font metadata where possible. If the font cannot be identified from a raster image, mark for human review.
Photography	Natural light, clean water, simple backgrounds, uncluttered compositions and realistic product presentation.	Flag misleading, low-quality, unrelated or visually cluttered imagery.
Product photography	Clear PET bottle, Deep Current cap, white label and Spring Teal droplet mark.	Compare packaging with the approved product reference. Do not infer a mismatch when the image is unclear.
Logo placement	Use an approved logo version with sufficient clear space and contrast.	Apply LOG-01 to LOG-06.
Composition	Clear visual hierarchy, adequate whitespace and readable product information.	Flag overlapping text, obscured product details and excessively crowded layouts.

Image rules

- IMG-01 - Relevance: Images must relate to water, refreshment, everyday hydration or the approved product. Avoid unrelated or misleading visual themes.
- IMG-02 - Authenticity: Do not alter the bottle shape, cap, label, product quantity or other material product characteristics in a way that could mislead viewers.
- IMG-03 - Brand colours: Use the approved palette for prominent design elements, text, logo and branded shapes. Do not introduce an unapproved colour as a dominant brand colour.
- IMG-04 - Quality: Use sharp, well-lit and high-resolution assets. Avoid pixelated, visibly distorted or watermarked images.
- IMG-05 - Composition: Keep the product and important copy visible. Do not allow decorative elements to obscure the brand name, product name, price or required information.
- IMG-06 - Permissions: Use only approved or properly licensed imagery. Record source and usage rights for third-party assets.
- IMG-07 - Accessibility: Text must remain readable. Provide meaningful alternative text for informational images in digital placements where the publishing format supports it.

Accessibility requirements

- IMG-08 - Contrast: Target at least 4.5:1 contrast for normal text and 3:1 for large text against its background.
- IMG-09 - Alternative text: Provide concise, meaningful alt text for informative images where the publishing format supports it.

AI review instruction: Use measured values for colour and contrast. Do not claim exact font recognition or definitive logo infringement from a low-resolution image. If visual evidence is inconclusive, request human review.

05 / COMMUNICATION STANDARDS

Brand voice, language & grammar guidelines

Teralune's voice should remain consistent while its tone adapts to the communication context. The brand should sound clear, calm, helpful and factual, never aggressive or medically authoritative.

Brand voice attributes

ATTRIBUTE	MEANING	PREFERRED APPROACH
Clear	Easy to understand without unnecessary jargon.	Use short sentences and familiar words.
Calm	Confident without shouting or pressuring the audience.	Avoid excessive capital letters, exclamation marks and urgent sales language.
Refreshing	Positive and relevant to everyday hydration.	Use simple sensory language only when it does not create unsupported claims.
Dependable	Honest and careful with product information.	Use verified facts; do not exaggerate product benefits.
Considerate	Respectful and inclusive.	Avoid insulting, discriminatory, shaming or manipulative language.

Writing and grammar rules

- LANG-01 - Grammar: Use grammatically correct English, including subject-verb agreement, correct tense, articles and plural forms.
- LANG-02 - Spelling: Use consistent English spelling. Do not introduce deliberate misspellings or informal abbreviations in formal brand communication.
- LANG-03 - Sentence clarity: Prefer concise sentences. Avoid confusing constructions, unnecessary repetition and vague statements.
- LANG-04 - Capitalisation: Use sentence case for body copy and headings unless the approved design template specifies otherwise. Do not use all-caps for full sentences.
- LANG-05 - Punctuation: Use standard punctuation. Avoid repeated exclamation marks, multiple question marks and excessive ellipses.
- LANG-06 - Terminology: Use the exact product name "Teralune Still Spring Water" and the unit style "500 mL".
- LANG-07 - Tone: Avoid aggressive urgency, insults, slang, fear-based messaging and unrealistic promises.
- LANG-08 - Inclusivity: Do not use discriminatory, humiliating or body-shaming language.

Preferred and discouraged language

PREFERRED	DISCOURAGED / FLAG
"Refreshment, Naturally."	"THE BEST WATER EVER!!!" - exaggerated and aggressive.
"A crisp, refreshing option for everyday moments."	"Our water make you feel amazing" - grammar error.
"Available in a 500 mL bottle."	"Drink this and cure tiredness" - unsupported health claim.
"Find Teralune at participating stores."	"Buy now or regret it forever!!!" - manipulative urgency.

AI review instruction: Distinguish a genuine grammar or spelling error from a subjective tone preference. Explain the specific language issue, quote the affected phrase and suggest a corrected version without changing the intended meaning. Treat unsupported product benefits under the claim rules, not merely as tone issues.

06 / MACHINE-READABLE REVIEW POLICY

AI review protocol & decision rules

This page provides a consolidated checking specification for Identiq. It describes how the AI should use this document, how findings should be classified and what evidence each finding should contain.

Required review sequence

- 1. Identify and extract: Determine the content type and extract visible copy, product names, prices, dates, claims, logo placement and available design properties.
- 2. Retrieve approved rules: Use relevant sections of this document and approved Brand Knowledge Hub records. Do not assume a rule that is not present.
- 3. Compare facts: Check product names, prices, SKU, pack size, terminology and colour values against the source of truth.
- 4. Assess language and visuals: Evaluate grammar, clarity, tone, image rules and unsupported promotional claims.
- 5. Produce evidence-linked findings: Include the affected phrase or element, rule ID, source reference, explanation and recommended action.
- 6. Preserve uncertainty: If evidence is missing or an image cannot be assessed reliably, request human review rather than inventing a conclusion.

Rule ID register

PREFIX	CATEGORY	RULES
LOG	Logo usage	LOG-01 to LOG-06: proportions, colour, clear space, size, background and integrity.
PRD / CLM	Product and claims	PRD-01 to PRD-05 and CLM-01 to CLM-04: name, SKU, size, price and approved wording.
TM / CP	Trademark and copyright	TM-01 to TM-06 and CP-01 to CP-06: mark, third-party rights, licences and ownership.
IMG	Image and design	IMG-01 to IMG-09: relevance, authenticity, palette, quality, composition, permissions and accessibility.
LANG	Language and grammar	LANG-01 to LANG-08: grammar, spelling, clarity, capitalisation, punctuation, terminology, tone and inclusivity.

Finding classifications

STATUS	MEANING	EXAMPLE
Supported	The submitted statement matches an approved record.	Price is ₹25 and the approved price is ₹25.
Conflicting	The submitted content contradicts an authoritative rule or fact.	Poster says ₹19 while the approved price is ₹25.
Unverified	The system cannot find sufficient approved evidence.	“Boosts immunity” has no approved supporting record.
Needs Human Review	The issue cannot be determined reliably by automation.	Logo is too small or low-resolution to assess accurately.

Required finding fields

Each finding should contain: finding ID; category; rule ID; status; severity; quoted or identified content; detected value; expected value where applicable; source document and page/section reference; explanation; suggested correction; confidence or uncertainty note; and whether human review is required.

Document control

Document: Teralune Brand Identity & AI Governance Guidelines | Version: 1.0 | Effective date: 1 April 2025 (fictional) | Owner: Teralune Brand Administration | Status: Sample approved reference for Identiq testing.

End of brand reference document. The companion advertisement is a separate test file and intentionally contains violations of the rules above.
